Scott McMillen presents lectures and hands-on training to dentists, auxiliaries, and technicians across North America. He is a guest lecturer at the Harvard School of Dental

Medicine and regularly conducts training programs at various state and regional dental conferences, including programs for the Yankee Dental Congress. Mr. McMillen is a certified instructor for the NTI-tss Plus™ appliance. As the National Manager of Product Training and Promotion for National Dentex Corporation, Scott facilitates comprehensive product and communications training by webinar for 43 dental laboratories in the United States and Canada.

The Art & Science of Shade Taking "Getting on the Same Wavelength"

Designed for the dentist and chairside assistant, this combination lecture and demonstration program will review manual and electronic methods of shade taking with an emphasis on practical and predictable protocol.

Participants will learn to:

- Measure tooth shade accurately with available shade guides
- Control the effects of operator environment on color perception
- Communicate effectively with the ceramist and laboratory

Esthetic Restoration Selection

New developments in both materials science and manufacturing methods have combined to alter the ceramic landscape. This program will review relevant science as it pertains to clinical results, including marginal integrity, fit, strength, and esthetics. Attendees will gain greater understanding of the newest ceramic technologies and learn to make informed ceramic choices.

Learning Objectives:

- Benefits of Layered, Pressed and Milled Ceramics
- Strength of Monolithic vs. Veneered Crowns
- New Ceramics Challenge Zirconia and PFM's
- Brand or Generic: Why Empress® and e.max®
- New Ceramics for Thin Veneers

Attendees can receive a **FREE \$70 diamond finishing kit!**
